Colour Analysis

---Color Alliance™ by Color Me Beautiful

We use the highly individualized Color Alliance™ system of colour analysis. This computer-assisted analysis is based not only on your colour “season” but also on the specific colours of your skin, hair and eyes. The result is not one of four seasons, but one of approximately four million possible colour combinations—nearly as unique as a fingerprint. Your personal colour palette will provide you with flattering choices of clothing colours to benefit you throughout your life.
